Company PROFILE

Powermac Limited was established in 2006 initially to provide temporary power on site, on demand and on time. Such items were generators and lighting towers. Our operational philosophies are guided by the Vision and Mission of its parent company Balroop's Sound Systems Limited (BSSL), which enjoys a reputation as an industry leader with over sixty (60) years experience in the business world.

At Powermac Limited our operational principles are steeped in integrity, respect and sound business practices that benefit our internal and external publics. With the increasing demand for other related products, we expanded our operations to include a greater variety making us evolve into a one-stop shop.
